LIVE GREENER

In recent decades, there has been a growing awareness of environmental issues in society as a whole, mainly due to the increasingly serious consequences of climate change and the progressive degradation of the natural environment caused by human activity.

Within this trend, the practice of "Green Architecture" stands as one of the main tools to promote a change of course that helps to ensure the sustainability of the planet and the preservation of its natural heritage. This book showcases recent house designs which exemplify green architecture and how such houses provide sustainable living environments.

- ♥ Highly browsable survey of international projects that feature a large degree of sensitivity to the environment
- ♥ Each project presents innovative design solutions in a variety of settings from city to countryside, tropics to the mountains

ART OF ALCHEMY

Alchemists are notorious for attempting to synthesise gold. Their goals, however, were far more ambitious: to transform and bend nature to the will of an industrious human imagination. For scientists, philosophers, and artists alike, alchemy seemed to hold the key to unlocking the secrets of creation. Alchemists' efforts to discover the way the world is made have had an enduring impact on global artistic practice and expression. Concoctions produced in the world's alchemy labs include inks, dyes, and oil paints; cements and ceramic glazing; dazzling effects in metalwork and glass – and the modern media which now claim boasting rights as the ultimate chemical mirrors of nature: photography and the liquid crystal displays of the digital world.

This book is the first to explore how the art of alchemy globally transformed human creative culture from antiquity to the industrial age, and displays the ways its legacy still permeates the world we make today.

LOOKING AT MANET

Manet's career was surrounded by controversy almost from the very start. The hard-edged technique of his early works was not what Salon audiences expected, and when he started painting subjects as uncompromising as the unclothed picknicker in the *Dejeuner sur l'herbe* or the aggressively naked young courtesan in *Olympia*, with her suggestive cat, Paris was outraged. Such scandal was grist to the mill of his friend, the outstanding Realist novelist Emile Zola. Zola's passionate polemic in Manet's defence is justly famous as one of the finest writings on art of the 19th century. Manet thanked Zola by painting his portrait, which the novelist commemorated in a further essay; and when Manet died at the early age of 51, Zola wrote a moving summation of his life's work.

Zola's writings on Manet, the most important of which are presented in this volume, were the first to identify the painter's seminal role in the emergence of modern art.

THE REAL SIR ARTHUR CONAN DOYLE

THE CREATOR OF SHERLOCK HOLMES

In the year 1900, Sir Arthur Conan Doyle was at the height of his success as a qualified doctor, keen sportsman, writer of historical novels, champion of the oppressed and, most notably, the creator of that honourable, fearless, and eminently sensible master-detective Sherlock Holmes. Every new Holmes story was greeted with great anticipation and confidence in the knowledge that, however complex the crime, the supremely intelligent and logical detective would solve it. But in 1916 Conan Doyle surprised his readers by declaring that he believed in spiritualism. And when, in 1922, Doyle published a book in which he professed to believe in fairies, his devotees were nonplussed. How could the creator of the inexorably logical Sherlock Holmes claim to believe in something as vague, esoteric, and unproven as the paranormal?

In this fascinating study of the life of the creator of one of the greatest detectives of all time, Dr Andrew Norman traces the origin of Sir Arthur Conan Doyle's strange beliefs. Can it be that Doyle's alcoholic father holds the key to the unanswered questions about his son? What was Doyle's involvement in the notorious 'Cottingley Fairies' affair? By delving into medical records and the writings of Doyle himself, Dr Norman unravels a mystery as exciting as any of the cases embarked upon by the great Sherlock Holmes!

DROPPING A STITCH

Milli loves visiting her great-grandma Ninny at her new home where other grannies live.

They are knitting together a coat for Milli's little dog Poochie. But lately, she isn't well. She often forgets things and stares at the walls.

Milli learned from her dad that Ninny is living with dementia, so her memory is getting weaker day by day. Milli's heart was broken into a thousand pieces when she saw her grandmother couldn't recognise her. But one day, while Milli is knitting, she has a pleasant surprise when Ninny notices she drops a stitch!

Dropping a Stitch is a delicate story for children trying to understand their relationship with a grandparent living with dementia. Children may learn what Dementia and Alzheimer's Disease are and what they can do if a loved one is living with dementia.

MODERN JAPANESE GARDENS

A Japanese garden represents the essence of Japanese culture, embodying the country's spirit and philosophy. It has a distinctive style, quality of materials and emphasis on details. Modern Japanese Gardens captures this spirit through the work of 20 contemporary Japanese garden design masters.

The gardens featured in Modern Japanese Gardens are drawn from a variety of locations in Japan, placed in different settings, from private houses and temples to cafés, restaurants and stores. Some are of traditional appearance; others have a distinctly modern aesthetic. In common, all the gardens have been influenced by Japanese culture and society, created by masters who are internationally recognised and lauded for their skills.

Modern Japanese Gardens includes insightful text on each garden, revealing the concept behind the design and the use of plants, alongside photography exploring both the detail and the overall aesthetic that shape the design.

From blossoms comes
this brown paper bag of peaches
we bought from the boy
at the bend in the road where we turned toward
signs painted Peaches.

From laden boughs, from hands,
from sweet fellowship in the bins,
comes nectar at the roadside, succulent
peaches we devour, dusty skin and all,
comes the familiar dust of summer, dust we eat.

O, to take what we love inside,
to carry within us an orchard, to eat
not only the skin, but the shade,
not only the sugar, but the days, to hold
the fruit in our hands, adore it, then bite into
the round jubilation of peach.

There are days we live
as if death were nowhere
in the background; from joy
to joy to joy, from wing to wing,
from blossom to blossom to
impossible blossom, to sweet impossible blossom

HOTBED

BOHEMIAN NEW YORK AND THE SECRET CLUB THAT SPARKED MODERN FEMINISM

The dazzling story of the Greenwich Village feminists who blazed the trail for the movement's most radical ideas

On a Saturday in New York City in 1912, around the wooden tables of a popular Greenwich Village restaurant, a group of women gathered, all of them convinced that they were going to change the world.

It was the first meeting of "Heterodoxy," a secret social club. Its members were passionate advocates of free love, equal marriage, and easier divorce. They were socialites and socialists; reformers and revolutionaries; artists, writers, and scientists. Their club, at the heart of America's bohemia, was a springboard for parties, performances, and radical politics. But it was the women's extraordinary friendships that made their unconventional lives possible, as they supported each other in pushing for a better world.

Hotbed is the never-before-told story of the bold women whose audacious ideas and unruly acts transformed a feminist agenda into a modern way of life.

New York City, 1912. The very idea of feminism is radical and outlandish, but a group of women believe that they can change the world. They meet in a bustling Greenwich Village restaurant and give their club a name that enshrines the notion of difference of opinion: *Heterodoxy*.

CHEFS' KITCHENS

INSIDE THE HOMES OF AUSTRALIA'S CULINARY CONNOISSEURS

Great food culture starts at home – especially when it’s from the chef’s home kitchen and garden! Be inspired by this unique and visually stunning book, which takes a behind-the-scenes look into the home kitchens (and gardens) of 22 of Australia’s celebrity chefs. Notable mentions include Frank Camorra (MoVida), Brigitte Hafner (Graceburn House & Tedesca Osteria in Red Hill, on Victoria’s Mornington Peninsula), Tony Niccolini (Italian Artisans), Scott Pickett (Estelle, Matilda, Lupo, and Audrey’s in Sorrento), and of course many others.

Featuring fabulous, inspiring conversations with each chef in their personal living spaces, while they are preparing a meal in their stunning kitchen, and with a close look at their kitchen’s architectural design, and garden style, this book celebrates not only some of Australia’s finest chefs, but also the architects who make these chef’s kitchens a pleasure to work in.

This beautifully illustrated book is filled with inspiration for foodies (included are recipes from the chefs), gardeners and design aficionados.

THEN AND NOW

Stalingrad was not only the most-crucial battle on the Eastern Front, it was the main turning point of the whole Second World War in Europe. The Third Reich had suffered setbacks earlier, notably at El Alamein in North Africa in October 1942, but the scale of the fighting on the Eastern Front was incomparably larger than any of the other war fronts and it was the fate of the armies there that decided the outcome of the global conflict. After the demise of the German 6. Armee at Stalingrad in February 1943 it was clear that Nazi Germany would lose the war.

This book brings together three After the Battle stories devoted to that historic struggle. It opens with a detailed account of the fight for the city of Voronezh. Lying on the great Don river, it was a prime initial objective of the German summer offensive towards the Caucasus launched on June 28, 1942. Possession of Voronezh would secure an eastern anchor point for a northern defensive line needed for the southward advance to Stalingrad. The city was taken with relative ease in early July but, when the Soviets launched a counter-offensive, the Heeresgruppe Süd commander, Generalfeldmarschall Fedor von Bock, allowed his panzer and motorised divisions to be drawn into the protracted fight. This week-long delay – which infuriated Hitler – severely disrupted the timetable for the main offensive, and fatally contributed to the failure to seize Stalingrad in a surprise raid.

DREAM GOLF COURSES

REMARKABLE GOLF COURSES AROUND THE WORLD

Location, location, location. There are many golf courses around the world -- 35,000 or more. And there are tens of millions of golfers, but a select group of golf courses that are outstanding examples of beautiful design, challenging layouts, and unforgettable settings.

Here are many of the world's best, 83 in all. There are courses in the British Isles, where golf was invented, Europe (France, Germany, Spain, Holland and Norway), the US, Canada, Mexico and outstanding courses in Africa, the UAR, Japan, Thailand, China, Australia, New Zealand and South Korea.

Each course description is a beautiful, double-page spread (some are 4 pages), with a history of its design, construction and great rounds played; the highlights of playing there now, a locator map, length and par play, and green fees for the course -- because these are courses we dream of playing, not just looking at!

This is a very beautiful book, featuring photography that will thrill any golfer, and have them planning for more trips -- with clubs.

FASHION DRAPING TECHNIQUES

Draping, also known as moulage, is a fashion design technique that involves working with fabric directly on a mannequin, 'sculpting' the toile on a dress form. Imagination and freedom are the key principles of this process, allowing the designer to start from an idea and change it as the garment progresses. Pieces take shape inch by inch on the dress form, going directly from sketch to fabric. Using the intricate process of draping, this extensively illustrated publication is an essential step-by-step guide for students, couture connoisseurs and fashion professionals who want to delve deeper into a technique used by prestigious fashion houses around the globe. It offers everything readers need to learn about the principles of draping and to gain a solid foundation for making their own imaginative pieces without limiting their creativity.

- ♥ A practical guide to draping, a technique that involves working with fabric directly on the dress form

ITALIAN FOOD

This is a critical and analytical look at Italian food, organised by type of dish rather than by region and is full of details of kitchens and cooking by painters from the 14th, 15th and 18th centuries.

The book is filled with asides and quotes from Italian writers and thinkers and as confirmation that this is more a work of scholarship than a simple book on cookery, there are appendices of bibliographies and notes on wine.

If you want to explore the authentic regional roots of the Italian kitchen, Elizabeth David's masterpiece is the place to start. And the joy and relevance of this book today is that recipes that could only be read 60 years ago can now be cooked and savoured.

Elizabeth David's acclaimed writings are often cited as an inspiration by many of today's leading chefs, as well as home cooks, and are essential to any serious cookery book collection.
